ABRASPIN

Patent pending sanding system, based on open mesh cloth and open pore flexible foam. Suitable for hand sanding to be used both of flat and shaped surface.

TECHNICAL
Grit: Aluminum Oxide
Coating: Patented Coating Process
Bonding: Patented Coating Resin
Grit Range: 500, 800, 1500,
Available dimension: 115x115, 115x140.

PROPERTIES
Possibility to work dry and wet.
Open mesh patented structure.
Working temperature lower than standard products
High removal rate
Very Long lifetime
Outstanding finishing

ADVANTAGES
Dry sanding increase productivity: check immediately work results.
Dust extraction through open structure even by hand sanding.
Uniform pressure thanks to backing foam
Perfect solution for shaped surfaces.

APPLICATION
Fine sanding of round edges, convex or concave.
Fine sanding on flat areas
Fine sanding of primer, paint and lacquers
Sanding for blending
Fine sanding before polishing
Mat sanding
